When CLEAN and DRY, reapply as per instructions.

# LanoProtect

**'Naturally Superior'**

## MAINTENANCE

All moored hulls **MUST** be visually inspected, and the hull wiped down every

4– 6 weeks if required

## LANOPROTECT MARINE BENEFITS SUMMARY

LANOPROTECT MARINE is a Natural Lubricant that won't wash away, won't evaporate, will protect, will penetrate and will seal. Without doubt LanoProtect Marine is the most versatile marine maintenance product available that is 100% environmentally friendly.

LANOPROTECT MARINE is the ideal marine coating because of its proven ability to resist acid etching, i.e. barnacles. Subsequent reapplication requires no special hull treatment such as sanding/grinding etc. Slipway or hardstand time will be greatly reduced due to the saving in preparation and spray application time.

LANOPROTECT MARINE will not totally stop bacterial attachments, but it drastically reduces this ongoing process and saves our marine environment.

LANOPROTECT MARINE will virtually eliminate electrolysis and will protect against corrosion.

***REPLACE ALL YOUR OLD BOTTLES AND CANS WITH  
LANOPROTECT MARINE – THE ULTIMATE IN TOTAL BOAT  
MAINTENANCE!***
